

POWER: WEALTH: CORRUPTION: FRAUD

A highly complex and largely discrete set of laws and exemptions from laws has been put in place by those in the uppermost reaches of the U.S. financial system. Not the 1%, but the .1%.

It allows them to protect and increase their wealth and significantly affect the U.S. political and legislative process. They have real power and real wealth.

Ordinary citizens in the bottom 99.99% are largely not aware of these systems, do not understand how they work, are unlikely to participate in them, and have little likelihood of entering the top .5%, much less the top .1%.

The Reality: those at the very top have no incentive whatsoever for revealing or changing the rules.

THEN USE THAT POWER TO OBTAIN WEALTH**
